

Compact Voip/ISDN Gateway

By Auerswald

Voice over IP (VoIP), the transfer of speech via the Internet attracts more and more followers.

The reason mostly is the enormous potential of saving telephony charges.

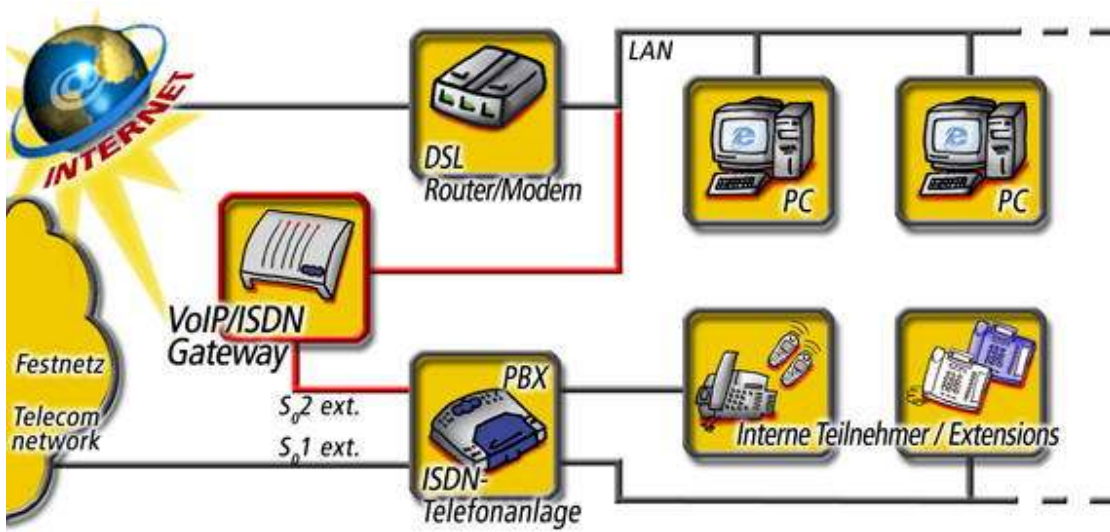

Even as an owner of a telephony system you can save money by now: with the VoIP/ISDN Gateway from Auerswald. Just connect it between your DSL router and an external S₀ port of your PBX and the gateway opens up the gate to free of charge* Internet telephony for you –

in excellent speech quality. And you can continue to use your existing hardware –

no new telephones, no new system, no additional costs. Even your installation remains completely as it is. Simply extend your system with the VoIP/ISDN Gateway and use the new possibilities immediately**.

You decide whether you want to make calls via ISDN and VoIP or to change over to the free of charge* Internet telephony completely as every external S₀ port of your PBX can be equipped with a VoIP/ISDN Gateway. Per gateway you can administrate up to 10 SIP accounts which means you can manage your numbers of different Internet telephony providers. These SIP numbers can be allocated to groups or subscribers as usual to whom the incoming calls will be distributed accordingly. And with Auerswald systems it works the other way round as well. Here you can define to which provider dedicated numbers should be routed to automatically. In this way you can use the same provider as your conversational partner ensuring cost optimised phone calls. Besides your wallet

nobody will notice that you are using VoIP.

- Voice over IP with ISDN telephone systems
- 2 Internet calls simultaneously
- Up to 10 SIP accounts, 10 numbers per account
- Free of charge phone calls*
- Easy configuration via web browser, predefined provider settings

Requirement: broadband Internet connection with a suitable tariff (e.g. a DSL flat rate). For this connection additional costs will arise. Normally the calls between s of the same provider or partner providers will be free of charge. For more information please contact the respective provider.
